Title of Study
Enhancing Students' Help-Seeking Behavior and Reinforcing Problem-Solving Skills (E-SHARP)

Principal Investigator
Dr. Kiran R. Bhutani

FWA00004459

INVITATION TO PARTICIPATE

For this activity, you are going to be asked some questions about help-seeking behaviors and sources of help that you use for your math class. We also will review class performance and work completed for your calculus course. There are no right or wrong answers. We just want you to answer the questions as best as you can. How you answer these questions will not have any impact on your grade in the course. You can skip any questions that you do not want to answer. It should take about 5 minutes to answer these questions for each survey. There is a short survey for each the five modules of the course. In addition, there are two 10 minute surveys- one at the beginning and one at the end of the course. Participating in this study will help you learn more about the strategies that you use and will be beneficial for future math courses. Would you like to participate in this study?
